

I. General Remarks Concerning This Response

Claims 1-50 are currently pending in this application; no claims have been amended, added, or canceled herein.

5 An after-final amendment was previously filed; Applicant understands that the after-final amendment was not entered.

The previously filed appeal brief argued against the double patenting rejection in the present patent application. Although Applicant continues to disagree with the argument in the double patenting rejection, Applicant is filing terminal 10 disclaimers for the related application in order to advance the prosecution of the patent application, thereby obviating the double patenting rejection. Since no other objections or rejections are outstanding, and formal drawings are also being filed by mail, this patent application is now allowable.
